

4 Day Sanitation Engineer Duties

The position of Sanitation Engineer at SISCRA's Willow Creek Campground begins a few days prior to park opening day and ends on park closing day. (Dates change each year and they will be announced annually). It is a four (4) day on and four (4) day off position which requires two (2) people to perform restroom cleaning and sanitation duties. Bathrooms are to be thoroughly cleaned each morning with an afternoon or evening check to verify there is sufficient hand soap, paper towels, toilet tissue to last until the morning routine and to check that the facilities are satisfactory and functioning properly. A salary will be paid monthly plus a RV parking space, and holding tank pumping. Your work days must be a mutual agreement between you and the other sanitation engineers.

The duties of the Sanitation Engineer are as follows:

1. To clean all restrooms at least once each day and disinfect any areas that might pass on any germs or disease.
2. Toilets and shower stalls are to be cleaned with chemical cleaners to disinfect and sanitize these facilities.
3. All waste paper from the restrooms must be bagged and put in the garbage dispensers.
4. Toilet paper and paper towels are to be replaced as needed.
5. Mop all restroom floors using a disinfectant.
6. Clean the areas around the entrance to the restroom as needed to present a pleasant appearance.
7. You will need to report all needed repairs to the gatekeepers or a board member.
8. SISCRA will provide all cleaning supplies, but you must report all necessary supplies when restocking is needed.
